

Dear partner,

Roche Diagnostics is a global leader in providing solutions for pathology laboratories for cancer prevention and diagnosis. We define the future of personalized medical care with integrated anatomic pathology systems, diagnostic tests of clinical importance and tools which enhance diagnostic reliability and optimize medical value.

Roche Diagnostics' digital pathology products combine innovative hardware and software, including uPath suite of image analysis algorithms, to be used together with Roche Diagnostics Hellas' full diagnostics portfolio for a complete solution.

Roche Diagnostics' diagnostic solutions for the anatomic pathology laboratory integrate and interact with BiopsySoft software*. BiopsySoft software is a Laboratory Information System and Histology Tracking System, adapted to the needs of each pathology laboratory.

Upgrade your anatomic pathology laboratory with Roche Diagnostics' diagnostic solutions in combination with BiopsySoft software, ensuring diagnostic accuracy and repeatability, while controlling your laboratory's workflows.
